

Francisco Cruzado

Corvallis, OR — cruzadof@oregonstate.edu — franciscoc.com

PROFESSIONAL EXPERIENCE

IT Service Desk Technician | Oregon State University *July 2025 - Present | Corvallis, OR*

- Leveraged ServiceNow, Azure AD authentication, and network management APIs, to support 40,000+ users across distributed infrastructure.
- Maintained user-facing documentation portal built on Angular, creating standardized UI for technical procedures and guides.

Software Engineer | United Nations Development Programme *Aug 2024 - Present | Remote*

- Co-developed a Java-based RESTful API with role-based access control for secure document access across 10 UN agencies; blocked 15+ unauthorized access attempts in two months.
- Replaced a Node.js backend with a lightweight Go service on Azure, reducing SQL Server query times by over 55%
- Enabled the rollout of a file-explorer-style UI using React v16 by structuring API responses to mirror an intuitive folder hierarchy; adoption reached 85% within two months
- Migrated KPI dashboards to faster pipelines by rewriting backend rendering logic in JavaScript for D3.js compatibility (minimized load times by 75%).

ERP Developer | BlueScope *June 2023 - May 2024 | Kansas City, MO*

- Translated Excel-based P/L reports into semi-automated BI dashboard.
- Built Python-based solutions for Power Automate to speed up Operations reporting from 7 plants.
- Designed and implemented BI dashboards for Operations and Finance teams.

Software Engineer Intern | United Nations *June 2022 - Dec 2022 | Remote*

- Developed a document processing pipeline using Elasticsearch analyzers (Pattern, Stop, Whitespace) to convert 550+ unstructured treaty documents into searchable, LLM-compatible XML format.
- Designed and deployed 5 Elasticsearch ingest pipelines to extract, index, and expose treaty sections (articles, tables, projections) for semantic search and data analysis.
- Authored over 25 PL/SQL stored procedures to power trade simulation models and optimize backend data access for international stakeholders.

PROJECTS

H1B Sponsor Checker | Chrome Web Store *Dec 2022 | 1000+ users*

- Built 3 persistent ETL pipelines for telemetry ingestion, job classification, and user donation tracking using AWS RDS, SQS, and DynamoDB.
- Designed a GCP-hosted queue system to process new job listings and classify H-1B sponsorship likelihood via a trained LIBSVM model.
- Maintained a local SQLite3-based sponsor database with keyword indexing and daily updates from live job market signals.

EDUCATION

M.S. Computer Science | Oregon State University *Sep 2024 - June 2026 | Corvallis, OR*

Courses: Operating Systems, Computer Networks, Computer Architecture, Parallel Programming

GPA: 3.84

BA Economics | St. Mary's University

Aug 2019 - May 2023 | San Antonio, TX

GPA: 3.82

TECHNICAL SKILLS

Languages: Python, PL/SQL, Golang, Java, C++, PHP, JavaScript, Bash

Data Tools: Redis, Elasticsearch, Power BI, MySQL, SQL Server

Cloud: GCP (VMs), AWS (RDS, SQS, DynamoDB, Cloud Practitioner Certificate), Azure (VMs)
